PREFACE.

The need of a complete and up-to-date buffet manual giving full directions for mixing and serving, not merely the new, and therefore popular drinks, but all the old ones as well, was never more needed than at the present time. New names are being applied to old drinks with but slight additions or substitutions in the mixing or dressing; for this reason a full and complete table of contents is given, thus enabling the reader and mixer to refer instantly to any particular drink, beverage or recipe, whether under the old name or one of the newly-applied terms.

A chapter on the preliminary methods of preparing beverages, including hints, suggestions and instructions as to the necessity for cleanliness and politeness, might not go amis, but since this manual is prepared for the home as well as the buffet, no further time need be occupied in moralizing.

In addition to the many excellent toasts suitable for use at all times and in all places, the chapters on Temperance and Invalids' Drinks and the recipes given for making Bitters, Syrups, Cordials, Brandies, Liquors, Ciders, Mineral Waters, Table Beers and Cocktails for Bottling, will be found a valuable and decidedly helpful addition to an up-to-date buffet manual.

The author is under obligations to Arthur Schiller & Co. and to Brunswick-Balke-Collender Co. for the many excellent illustrations used in this book.

The proportion of 30 parts of sugar to 16 parts of water also makes an excellent syrup.

It is worth adding that it will be found best to employ only the best refined sugar, and filtered water, soft as possible. By so doing it often saves the trouble of clarification, which invariably becomes necessary when inferior ingredients are used.

The best plan is to pour the water cold over the sugar and let it slowly melt; and, when saturated, boil it up to the boil by a gentle heat, and then keep simmering to the point desired.

Bruise half a pound of the best new Jamaica ginger in an iron mortar, and put it into a bottle containing one pint of spirit of wine (60 O. P.), and one pint of water, allow it to macerate for ten or twelve days, shaking it up well each morning. After the twelfth day transfer it to a funnel containing a paper filter; when all the liquid has run through pass two pints of sherry over it, and lastly, one pint of boiling water. This will yield rather better than half a gallon of liquid. When all are mixed, dissolve in this one ounce of burned sugar, and having added twelve pints of syrup, shake the whole well up, and fine with alum, etc.

GINGER GIN.

Take of best Jamaica ginger, bruised small, half a pound; boil it in one gallon of water, and strain through fine muslin. In this dissolve ten pounds of refined sugar by means of a gentle heat. 12 gallons water.
60 lbs. brown sugar.
Dissolve, by boiling; add yeast and ferment; then add brandy four pounds; and bung it up for three months. Disagreeable when cold, but if mulled with allspice and drank warm in winter time, it forms a useful stimulant.

Ferment.

ORANGE WINE.

23 lbs. sugar.

BIRCH WINE.

In February or March, bore holes in birch trees, and when you have secured 9 gallons juice, boil and skim, cooling it down to 100 degrees Fahrenheit. Dissolve in it 9 pounds sugar, adding two ounces lemon, cut fine; produce fermentation with 1 pint of gluten. Keep keg full constantly, when the fermenting is over, draw it off and strain, or filter into another keg in which you have burned a piece of brimstone paper.

BLACKBERRY WINE.

$\frac{1}{2}$ ounce ground cinnamon.
 $\frac{1}{4}$ ounce ground cloves.
1 drachm cardamom seeds.
1 drachm grated nutmeg.

Mash the berries, pour on 5 gallons water, heat all to a boiling point but do not let it boil.

Add $1\frac{1}{2}$ galls. white syrup; pour all into a 10 gallon keg, keep in a warm place, keep keg full, and after fermenting, strain and press, add one gallon neutral spirits, filter or fine all, and when clear, bottle, and you will have the best.

5 gallons black currants.

5 gallons water.

10 pounds crushed sugar.

Dissolve sugar in the water. Heat all to 100 degrees Fahrenheit.

3 gallons water.

3 pounds sugar.

4 ounces Jamaica ginger.

Boil one hour. Strain. Add 3 lemons chopped fine, and half a pint of yeast.

Mix together and pour into a keg. After it has fermented 1 week, draw it; it is ready for use.

GRAPE WINE.

Pick over carefully, thoroughly ripe grapes, free from stems and blemishes, press out the juice; to

one quart of juice add one quart of water, (soft, boiled water is best), add $1\frac{1}{4}$ pounds sugar. After it is done fermenting, bung up tight. It will be ready to draw off in 3 months or sooner, but will be a far better wine in a year, if left unmolested until then.

PARSNIP WINE.

18 pounds of sweet parsnips.

3 gallons of water.

Boil together soft, press liquor through a sieve, add to each gill 3 pounds loaf sugar; when nearly cold add yeast. Let the wine stand open ten days, stirring from the bottom, several times each day.

Then put it in a cask, and keep it full up to the bung with liquor reserved for that purpose, as it works out.

RHUBARB WINE.

Let it ferment, and bottle when clear.

TOMATO WINE.

One quart tomato juice.

One pound sugar.

Use no yeast, as it will ferment without it. This wine is much thought of in some places, and is easy to make.

INVALIDS' DRINKS.

APPLE WATER.

(The same for any of the fruits, viz.: pears, peaches, plums, French prunes, figs, raisins, rhubarb, etc.)

Boil a large, juicy apple, (parred, cored and cut into pieces) in a pint of water in a close-covered saucepan, until the apple is stewed into a pulp. Strain the liquor, pressing all the juice from the pulp. Sweeten to taste. Sometimes these fruit-waters are made with rice or barley water. To be drank cold.

BARLEY WATER.

Add to a pint of boiling water half a tablespoonful (half an ounce) of barley, rubbed smooth, with two tablespoonfuls of cold water; add also a pinch of salt and a tablespoonful of sugar. Let it boil five minutes. It is to be drank cold. The simple barley water has not an unpleasant taste, and is often prepared without additional flavor. Yet zest i. e., the thin yellow cuts of the rind of a lemon, or lump sugar rubbed over to extract the oil, can be added as flavoring, or a lemonade may be made of barley water.

Barley water may be used temporarily instead of milk.

BEEF TEA.

(Use a hot-water glass.)

$\frac{1}{2}$ teaspoonful of the best beef extract.

Fill the glass with hot water; stir well with a spoon; place pepper, salt and celery salt so as the customer can season to suit himself.

CINNAMON WATER.

Add five or six sticks (half an ounce) of cinnamon to a pint of boiling water, and boil fifteen minutes.

To be administered by the tablespoonful.

Given for hemorrhages.

CURRANT JELLY WATER.

(For fever patients.)

A teaspoonful of currant jelly, dissolve in a goblet of water, and sweeten to taste, affords a refreshing drink for invalids.

FLAXSEED TEA.

Add half a cupful of flaxseed to four cupfuls, or a quart, of boiling water. Let it boil half an hour. Let it stand fifteen or twenty minutes near the fire, after it has boiled. Of course the longer it stands the thicker it becomes. Strain, sweeten to taste, and add a little lemon-juice, or not, as preferred.

This is a useful demulcent drink for coughs, etc.

FLAXSEED AND LICORICE TEA.

Pour one pint of boiling water over one ounce of flaxseed, not bruised, and two drachms of licorice-root bruised, and place the covered vessel near fire for four hours. Strain it through a sieve,

GRAPE JUICE.

Allow one pint of water to three pints of fruit (picked from stems). Let it simmer slowly for five minutes, then strain it through flannel or cheese cloth. It is drunk cold without sweetening. Add a little sugar if not sweet enough.

LIME WATER.

Pour over a piece of fresh unslacked lime, about an inch square, two quarts of hot water. When it has slacked (in a few minutes) stir it thoroughly. Let it remain over night. Bottle carefully all the liquid that can be poured off in perfectly clear state.

As water will only hold a certain amount of lime in solution, the addition of more lime would make the water of no great strength.

Lime water (an alkali) is generally added to milk for the purpose of neutralizing the effects of an acid stomach.

About a teaspoonful to a tablespoonful of lime water to a half pint of milk is usually prescribed.

OATMEAL DRINK.

Rub two tablespoonfuls (two ounces) of oatmeal smooth by gradually stirring in a teacupful of cold water; add a pinch of salt. Stir this into a quart of boiling water and let it boil half an hour. Strain it through a fine sieve.

RICE WATER.

Take best Carolina or Patna rice, should be washed with cold water, then boiled in a good measure of

water for ten minutes, the water strained off, and more added; and so on till the goodness is boiled out of the rice. The water is ready to drink when cold. Cream may be added if there be not high fever; a pinch of salt also, if desired, or flavoring as for barley water.

SIMPLE BEVERAGES FROM FRUITS.

Currant jelly water (or any acid jelly—cranberry, plum, etc.)

If the jelly is soft, a teaspoonful is dissolved in a goblet of fresh cold water, and sweetened to taste.

If the jelly is hard, it will have to be added to boiling water to become dissolved. To be drank cold.

The fresh fruits are, of course, to be preferred.

There is nothing more refreshing than currant water made from fresh currants.

This can be prepared by allowing a pint of water to a pint of currants (freed from stems) and a tablespoonful of sugar.

Heat these slowly in a porcelain or granitized iron kettle until it boils, then let it simmer for five minutes. Strain it through a cloth, let cool, and sweeten again to taste. It can be diluted with water.

If strawberries, raspberries, black raspberries, or blackberries are used, prepare them in the same manner, excepting that for each quart of berries a pint of water with a tablespoonful of sugar should be used.

TAMARIND WATER.

Stir into a glassful of water a tablespoonful of preserved tamarinds.

TOAST WATER.

Toast thoroughly thin slices of graham bread, and break them into a bowl. Pour over enough boiling water to cover it when cold; strain off the water and sweeten it slightly. Serve it always freshly made.

WHITE WINE WHEY.

Put two pints of new milk in a saucepan, and stir it over a clear fire till it is nearly boiling; then add a quarter of a pint of sherry, and simmer for a quarter of an hour, skimming off the curd as it rises. Then add a tablespoonful more sherry, and skim again for a few minutes, till the whey is clear; sweeten with loaf sugar, if required.

Or the whey can be made in the same manner with lemon juice (free from seeds), using the juice of half a lemon instead of wine, a tablespoonful being quite enough for a pint of milk.

In an alimentary point of view, whey is almost of no value. It is advantageous as a drink in febrile diseases, and is a good means of administering wine in small quantities.

It may be drank either cold or warm.

It possesses sudorific and diuretic properties.

WINE, LEMON OR VINEGAR WHEY.

When a pint of milk is brought just to a boil, pour in a gill of sherry wine. Let it again come to a boil. When the whey separates, strain and sweeten to taste, using perhaps a teaspoonful of sugar.

Very little of the cider sold in cities is pure apple

juice. As recipes for artificial cider are advertised and sold at pretty high prices we presume they are wanted. We therefore, append some recipes which will produce at small cost a palatable and innocent imitation of genuine cider, the supply of which is probably too small for the demand in most sections.

SWEET CIDER.

- 100 gallons water.
- 5 gallons honey.
- 3 oz. Catechu, powdered.
- 5 oz. alum.
- 2 pts. yeast.

Ferment for fifteen days in a warm place (in the sun if possible); add, then, bitter almonds half a pound; cloves half a pound; burned sugar, two pints; whisky, three gallons. If acid should be in excess, correct by adding honey or sugar. If too sweet, add sulphuric acid to suit the taste. We should prefer to add cider vinegar for acidulating, when necessary.

CHEAP MADE CIDER.

- 1 hogshead good cider.
- 1 hogshead water.
- 50 lbs. molasses.
- $\frac{1}{2}$ lb. alum, dissolved.
- Brimstone matches to stop fermentation, by burning.

IMITATION CIDER.

- 35 gallons water.
- Sulphuric acid, enough to make the water pleasantly sour.

50 lbs. brown sugar.

4 oz. alum.

5 oz. ginger.

5 oz. cloves.

6 oz. bitter almonds.

Boil the four last ingredients in two gallons of the water for two hours, strain and add this decoction to the other water. Burned sugar may be added to color, if wished. From three to four gallons of whisky, if mixed with it, will give more body.

It is generally known, we suppose, that bisulphite of lime may be advantageously employed in fresh cider to stop its conversion to vinegar.

WHITE SPRUCE BEER.

1½ pint essence of white spruce.

3 gallons boiling water.

6 lbs. of loaf sugar.

Ferment with yeast, and use same formula as in ginger beer.

SARSAPARILLA BEER.

1½ oz. compound extract of sarsaparilla.

1½ pint of water.

Infuse and when cold add eight pints of good root beer.

TEMPERANCE DRINKS.

DRAUGHT LEMONADE, OR LEMON SHERBET.

5 lemons, sliced.
4 oz. lump sugar.
1 qt. boiling water.
Very fine.

DRAUGHT LEMONADE, OR LEMON SHERBET.

(A cheaper method.)

1½ oz. cream of tartar.
1½ oz. tartaric or citric acid.
Juice and peel of three lemons.
2 lbs. or more loaf sugar.

The sweetening must be regulated according to taste.

GINGER LEMONADE.

Boil ten pounds and a half of lump sugar for twenty minutes in ten gallons of water; clear it with the whites of six eggs. Bruise half a pound of common ginger, boil with the liquor, and then pour it upon ten lemons pared. When quite cold put it in a cask, with two tablespoonfuls of yeast, the lemons sliced, and half an ounce of isinglass. Bung up the cask the next day; it will be ready in two weeks.

IMPERIAL DRINK FOR FAMILIES.

3 oz. cream of tartar.
Juice and peel of 3 or 4 lemons.
2 lb. coarse sugar.

Put these into a gallon pitcher and pour on boiling water. When cool, it will be fit for use.

LEMONADE.

(Use large bar glass.)

Juice of $\frac{1}{2}$ lemon.

$1\frac{1}{2}$ tablespoonful of sugar.

2 or 3 pieces of orange.

1 tablespoonful of raspberry or strawberry syrup.

Fill the tumbler full with shaved ice, the balance with water, and ornament with fruits in season.

LEMONADE.

(Fine for parties.)

Rind of 2 lemons.

Juice of 3 large lemons.

$\frac{1}{2}$ lb. of loaf sugar.

1 qt. boiling water.

Rub some of the sugar in lumps on two of the lemons until they have imbibed all the oil from them, and put it with the remainder of the sugar into a jug; add the lemon juice (but no pips), and pour over the whole a quart of boiling water. When the sugar is dissolved strain the lemonade through a piece of muslin, and, when cool, it will be ready for use.

The lemonade will be much improved by having the white of an egg beaten up with it; a little sherry mixed with it also makes this beverage much nicer.

HOT LEMONADE.

(Use large bar glass.)

1 tablespoon sugar; $\frac{1}{2}$ a lemon squeezed well; fill the glass with hot water; stir well, and serve.

Pour a little hot water into the glass, and shake around it before making the drink to prevent the glass from cracking.

ORANGE LEMONADE.

(Use large bar glass.)

 $\frac{1}{2}$ glass shaved ice.

2 tablespoonfuls powdered sugar.

Juice of 1 orange.

1 or 2 dashes lemon juice.

Fill up with water; shake and dress with fruit.
Serve with straw.

SARATOGA, OR SEA BREEZE, EGG LEMONADE.

(Use large bar glass.)

1 egg.

2 teaspoonfuls powdered sugar.

 $\frac{1}{2}$ the juice of a lemon.

Fill $\frac{3}{4}$ of the glass with shaved ice; balance with
water; use the shaker until well mixed; strain and
serve; grate a little nutmeg on top.

SELTZER LEMONADE.

(Use large bar glass.)

2 tablespoonfuls powdered sugar.

5 or 6 dashes lemon juice.

 $\frac{1}{2}$ glass shaved ice.

Fill up with Seltzer water.

Stir well and serve.

SODA LEMONADE.

(Use large bar glass.)

2 teaspoonfuls powdered sugar.

 $\frac{1}{2}$ glass shaved ice.

3 or 4 dashes lemon juice.

1 bottle plain soda water.

Stir well. Serve.

LEMONADE POWDERS.

1 lb. finely-powdered loaf sugar.

1 oz. tartaric or citric acid.

20 drops essence of lemon.

Mix, and keep very dry.

Two or three teaspoonfuls of this stirred briskly in a tumbler of water will make a very pleasant glass of lemonade. If effervescent lemonade be desired, $\frac{1}{2}$ oz. of carbonate of soda must be added to the above.

MILK AND SELTZER.

(Use a medium-sized bar glass.)

In serving this drink, which is strictly temperance, half fill the glass with Seltzer, and the rest with milk; if it is done otherwise you will have nothing but foam in your glass, which would cause delay.

NECTAR.

1 dr. citric acid.

1 sc. bicarbonate of potash.

1 oz. white sugar, powdered.

Fill a soda-water bottle nearly full of water, drop in the potash and sugar, and lastly the citric acid. Cork the bottle up immediately and shake. As soon as the crystals are dissolved the nectar is fit for use. It may be colored with a small portion of cochineal.

ORANGEADE.

This agreeable beverage is made the same way as lemonade, substituting oranges for lemons.

RASPBERRY, STRAWBERRY, CURRANT OR ORANGE EFFERVESCENT DRAUGHTS.

Take one quart of the juice of either of the above fruits, filter it, and boil it into a syrup, with one pound of powdered loaf or pulverized sugar. To this add one ounce and a half of tartaric acid. When cold put it into a bottle and keep it well corked. When required, fill a half-pint tumbler three-parts full of water, and add two tablespoonfuls of the syrup. Then stir in briskly a small teaspoonful of carbonate of soda. The color may be improved by adding a small portion of cochineal to the syrup at the time of boiling.

SHERBET.

10 oz. carbonate of soda.

8 oz. tartaric acid.

3 lbs. loaf sugar, finely powdered.

4 dr. essence of lemon.

Let the powders be very dry. Mix them intimately, and keep them for use in a wide-mouthed bottle closely corked.

Put two good-sized teaspoonfuls into a tumbler; pour in half a pint of cold water, stir briskly, and drink off.

SODA NECTAR.

2 dashes lime juice.

Juice of 1 lemon.

$\frac{1}{2}$ glass of water.

Powdered sugar to taste.

$\frac{1}{2}$ small teaspoonful carbonate of soda.

Strain the juice of the lemon, and add it to the

water, with sufficient white sugar to sweeten the whole nicely. When well mixed put in the soda, stir well, and drink while the mixture is in an effervescing state.

TOASTS.

For many of the following excellent toasts the author is under singular obligations

TO MR. WILLIAM H. EVARTS,
the well-known American comedian, whose familiar figure and pleasing individuality on the stage has made countless thousands laugh, and whose glad-hand and good-fellowship off the stage has won the admiration of the least and greatest of his noble profession.

Here's a sigh for those who love us,
Here's a smile for those who hate;
And whatever sky's above us,
Is a heart for any fate.

I drink to the health, to the love and the wealth
Of the girl who is queen of them all,
May her heart be as light as my own is to-night
As in fancy I lis't to her call.

May her soul be as pure as her features are fair,
And her love linger on to the last;
That some day we may sit by the fire and dream
Of the sweet lover days of the past.

May her smiles cast one sunshine on every life,
That they gently bestow on mine,
And old Time only serve to make truer the heart,
As it serves to make sweeter the wine.

Instead of a song, boys, I'll give you a toast,
 Here's to the memory of those ——* that we lost;
 That we lost, did I say? Nay, by heaven, that we
 found,
 For their fame it shall last while the world goes
 round.

The next in succession I'll give you the ——†
 Whoe'er would betray him, on high may he swing!
 And here's to the grand fabric, our free Constitution;
 And longer with Politics, not be cramm'd,
 Be Anarchy curs'd and be Tyranny damm'd;
 And who would to Liberty e'er prove disloyal,
 May his son be a hangman and he his first trial!

—After Robert Burns.

Here's to Life! Our entrance into it naked and bare,
 Our journey through it, trouble and care.
 Our exit from it, God knows where,
 But if we're all right here, we're all right there.

Here's to sunny skies!

Here's to our wives and sweethearts—may they
 never meet.

In climbing the ladder of prosperity, may you never
 meet a friend

Here's to you as good as you are, and here's to me
 as bad as I am, but as good as you are and as bad
 as I am, I'm as good as you are as bad as I am.

Here's to your health and your family's good health;
 may they live long and prosper.

*"On the Maine," or "At Gettysburg," etc.

†"The President" (U. S. or some Club), "The Gov-
 ernor," etc.

Here's to the maiden of bashful fifteen,
Here's to the widow of fifty;
Here's to the flaunting, extravagant queen,
And here's to the housewife that's thrifty.

Let the toast pass—
Drink to the lass;
I'll warrant she'll prove an excuse for the glass.

Fill me with the rosy wine,
Call a toast, a toast divine;
Give the poet's darling flame,
Lovely —— be the name;
Then thou mayest freely boast
Thou hast given a peerless toast.

Here's to the sparkling wine;
Here's to your sweetheart and mine;
May he be faithful and she be true.
Say, "I'd leave my happy home for you."

May the mouse ne'er run away frae ye meal barrel
wi' a tear in her eye.

Whatsoever your path may be,
Peace and plenty may you see;
And may life as on it goes,
Love's rich blessing still disclose,
So here's to you and me!

Here's to health and prosperity.
With kind regards.
Here's to all the hair off your head.
